

SAMARTH BHAGAVANT PATIL

Aspiring AI Engineer | Software Engineering Student | Intelligent Automation & Practical AI Solutions

Bengaluru, Karnataka, India | samarthpatil3996@gmail.com | +91 9480971996
LinkedIn: [Samarth Patil](#) | GitHub: [Samarth11x](#) | Portfolio: Coming Soon

PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong passion for Artificial Intelligence, software engineering, and intelligent automation. Skilled in designing real-world academic and personal projects — AI systems, commercial web platforms, and productivity applications — while continuously learning backend engineering and scalable system design.

EDUCATION

Garden City University

Bachelor of Engineering — Computer Science & Engineering

Bengaluru, Karnataka • CGPA: 9.46 / 10

Expected Graduation: 2028

TECHNICAL SKILLS

- **Programming Languages:** Python (Intermediate) | C/C++ (Intermediate) | Java (Beginner) | JavaScript (Intermediate) | SQL (Intermediate)
- **Web Technologies:** HTML | CSS | React (Beginner) | FastAPI (Basic)
- **Databases:** MongoDB | MySQL | SQL
- **Tools & Platforms:** Git | GitHub | VS Code | Microsoft Azure Fundamentals
- **Currently Learning:** TypeScript | Node.js | Docker | PostgreSQL | AI Agents

FEATURED PROJECTS

JARVIS OS — AI Assistant Platform

Ongoing

Python • FastAPI • React • AI Architecture

- Designed the architecture of a modular **AI assistant platform**, planning conversational AI, memory, voice interaction, and intelligent agent capabilities.
- Applied **sprint-based development** and scalable project organization to build an extensible foundation for future AI features.

AlphaX — AI Trade Analysis Platform

Ongoing

Python • AI • Analytics

- Designing an **AI-powered platform** to help traders analyze performance, calculate risk, and improve decision-making.
- Planning modules for trade journaling, performance tracking, and AI-assisted insights using an **iterative development** process.

KP Kurtie Points — Commercial Retail Platform

2026

HTML • CSS • JavaScript

- Developed a **commercial web platform** concept for a clothing retail business, with product showcase and pricing management interfaces.
- Focused on **responsive design** to improve customer browsing experience.

Zenera Trips — Travel Booking Platform

2026

React • JavaScript

- Developed a **responsive travel booking platform** prototype with intuitive booking workflows and reusable UI components.
- Focused on creating a clean and **user-friendly interface**.

Habit Tracker

2026

JavaScript

- Built a **productivity application** to monitor habits, daily goals, and personal consistency.
- Implemented **structured progress tracking** to encourage disciplined routines with a focus on simplicity.

CERTIFICATIONS

Microsoft Azure Fundamentals • Linux Shell Scripting • HTML5 & CSS3 • MongoDB Basics • SQL & DBMS • Cloud Computing Fundamentals (all via Coursera)

ACHIEVEMENTS

- Maintained a **9.46 CGPA** in Computer Science Engineering.
- Built multiple **AI, web development, and productivity-focused** software projects.
- Designed **JARVIS OS**, a modular AI assistant platform using structured software architecture.
- Currently developing **AlphaX**, an AI-powered trade analysis platform.

AREAS OF INTEREST

Artificial Intelligence • Intelligent Automation • Software Engineering • Backend Development • System Design • AI Agents
